

JLG Forklift Part

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora set out on a cross country trip in their RV. Recently retired, after spending numerous years working with his brother to manufacture their crane company into an market leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road expedition.

Whilst on their trip, John spent time talking to former business associates whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John discovered a considerable market for a product that could swiftly and securely lift people in the air to accomplish maintenance and other construction services.

Upon returning from their travels, John formed a partnership with two friends and purchased a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty employees, they built and sold the first JLG aerial work platform. The company incorporates many of the simple design essentials of that original lift into current models.

JLG lift trucks have come a ways since Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. These days, the company proudly continues to expand itself into many marketplaces worldwide and develops new products to ensure clients are capable of being more efficient and perform in the workplace within a safer atmosphere.
