

Electrical Part for Forklifts

Electrical Part for Forklifts - Lift trucks along with different lift trucks can have particular labels utilized in certain hazardous locations. The mark denotes that this specific model of forklift meets the minimum standards of ANSI/UL 553 used for electric lift trucks or ANSI/UL 558 meant for internal combustion engine lift trucks.

Applications for marked trucks may be found in National Fire Protection Association NFPA 505 - Powered Industrial forklifts including: Type Designations, Areas of Use, and Maintenance and Operation. Ask your local insurance carrier and Fire Marshall for more information regarding the permitted uses of industrial powered lift trucks in your application.

If the particular lift truck meets the outlined standards, labels could be placed. A labeled forklift will show the type of designation put on the nameplate and would have a correctly corresponding label attached.
